

SOLAR SYSTEM

MERCURY

Diameter: 4879 km

Distance from Sun: 57.9 million km

Length of day: 4222.6 hours

Length of year: 88.0 days

VENUS

Diameter: 12,104 km

Distance from Sun: 108.2 million km

Length of day: 2802.0 hours

Length of year: 224.7 days

EARTH

Diameter: 12,756 km

Distance from Sun: 149.6 million km

Length of day: 24 hours

Length of year: 365.25 days

MARS

Diameter: 6792 km

Distance from Sun: 227.9 million km

Length of day: 24.7 hours

Length of year: 687.0 days

JUPITER

Diameter: 142,984 km

Distance from Sun: 778.6 million km

Length of day: 9.9 hours

Length of year: 4331 days

SATURN

Diameter: 120,536 km

Distance from Sun: 1433.5 million km

Length of day: 10.7 hours

Length of year: 10,747 days

URANUS

Diameter: 51,118 km

Distance from Sun: 2872.5 million km

Length of day: 17.2 hours

Length of year: 30,587 days

NEPTUNE

Diameter: 49,528 km

Distance from Sun: 4495.1 million km

Length of day: 16.1 hours

Length of year: 59,800 days

PLUTO

Diameter: 2370 km

Distance from Sun: 5906.4 million km

Length of day: 153.3 hours

Length of year: 90,560 days
